Easy & Effective Energy Savings Results

EnerLogic®

Maximizing Your Home's Livability

EnerLogic® window film, a revolutionary glass insulation technology, outsmarts the sun to help you save energy and money, and increase your home's comfort—all year long.

Save
on your
energy
bills

Money In The Bank

EnerLogic film is able to transform existing poorly-insulated windows into energy efficient windows. It gives single-pane windows the annual insulating performance of double-pane windows, and makes double-pane windows perform like triple-pane!

Don't replace your windows, enhance them with EnerLogic window film.

Single pane windows + EnerLogic window film = Dual pane windows

UP TO **92%**

Energy Costs
are Lost through
Your Windows!

Here an infrared camera illustrates heat escaping through untreated windows, on the right. The left window, treated with EnerLogic, shows a reduction in heat loss.

WITH & WITHOUT

Say
Goodbye
to hot and
cold spots

Layer On The Comfort

Sitting near a window in the winter can give you a chill, while summer heat can drive you out of your favorite room. Resolving these issues used to mean adding an extra layer of clothing for warmth or turning on a fan to cool off.

By simply installing EnerLogic window film on to your existing glass you will have up to 92% more insulating power — creating a more comfortable environment for your whole family.

A New Outlook

Daylight can cast so much harsh glare on your TV, laptop or computer that it strains your eyes and interferes with your viewing enjoyment. With EnerLogic film applied to your glass, you won't have to close the drapes to enjoy your electronics in daylight.

Bright sunlight can also contribute to the fading of most fabrics, furnishings and artwork. EnerLogic films will block up to 99% of all UVA and UVB rays, helping to protect your family and furnishings without obstructing your view.

your family
and your
furnishings

Reduce your
Cooling Bills
UP
TO **50%**

In hot climates, standard windows allow solar heat into your home, which can drive up your cooling costs. EnerLogic® film adds a subtle but effective barrier on your existing windows, letting natural sunlight in...but filtering out excess heat, glare, and UV radiation. This produces up to a 33% savings boost on cooling costs over conventional films⁽¹⁾.

The **Ultimate** in Energy Efficiency

In cold weather, even multi-pane windows allow warmth to escape from your home. EnerLogic window film helps keep radiant heat inside your home to increase comfort and decrease wasted energy. It's the only window film of its type that has demonstrated heating savings in cold-weather climates – up to 10% on single-pane windows!

All Season
Energy Saving
Window Film

EnerLogic®

MAX PERFORMANCE *and energy savings*

Provides a Perfect Balance...

of energy efficiency, comfort, and cost savings - all year round.

1. Maximum performance and energy savings.

Industry leading Low-E insulating performance resulting in year round comfort and energy savings in all climates.

2. Save up to 50% on cooling bills and up to 10% on heating bills.

Upgrades the annual insulating performance of single-pane windows to that of double-pane windows and double-pane to triple-pane⁽¹⁾.

3. More comfortable environment with less harmful UV rays.

Keeps solar heat out of your home in the hot weather and radiant heat inside your home during cold weather.

4. Money back in your pocket without the high cost of window replacement.

Installing EnerLogic film is typically about one-third the cost of replacement windows without all the hassles.

Product Specs

| | |
|--|-----|
| Total Solar Energy Rejected (Higher % = less heat in summer) | 76% |
| Glare Reduction (Higher % = less glare) | 63% |
| Ultraviolet Rejection (Higher % = less harmful UV rays) | 99% |
| Visible Light Transmittance (Higher % = more light shining through) | 33% |
| Visible Light Reflectance (Interior) (Lower % = less reflective/clearer view) | 30% |

Quality that's Worth a Guarantee.

EnerLogic window film is durable, scratch resistant, and easy to clean. We stand by our products with a lifetime manufacturer's warranty.⁽²⁾

10 Reasons *Why* you will love EnerLogic®

Gold Standard in Performance

Why Gold? It's not just a precious metal, but a precious component in the world's most advanced technologies. Its unique properties have enabled such landmark innovations as circuit boards, semiconductors, spacecraft, and now... window film.

We've harnessed the extraordinary ability of gold to reflect heat and radiation, and applied it to our award-winning EnerLogic window film series. While some products, like VEP 70, utilize gold in the manufacturing process, all products in the EnerLogic series reach previously unattainable performance in appearance and energy savings, creating the new gold standard in window film.

To guard against lesser imitations, we introduced the Gold Standard Window Film seal. This exclusive mark will only be applied to EnerLogic films, available only from certified dealers. The Gold Standard Window Film seal provides absolute certainty that you are receiving the most technologically advanced product on the market. When you find the Gold Standard seal, there's no need to look any further.

- 1 › Year-round savings on energy bills
(Less use of heaters and air conditioners)
- 2 › Keeps heat out during the summer
- 3 › Keeps heat in during the winter
- 4 › Adds up to 92% more insulating power to your windows
- 5 › Protect yourself and home furnishings from up to 99% of harmful UV rays
- 6 › Quick and Easy installation by certified installers
- 7 › Fraction of the cost of replacing windows
- 8 › Alternative to creating landfill waste caused by window replacement
- 9 › Highest performing Low-E window film available
- 10 › Peace of mind knowing EnerLogic is backed by a lifetime warranty⁽²⁾

HIGH PERFORMANCE

*without changing
your view*

Provides a Perfect Balance...

of energy efficiency, comfort, and cost savings - all year round.

1. High performance without changing your view.

Virtually invisible appearance by harnessing the power of gold to achieve year round performance, comfort and energy savings.

2. Save up to 50% on cooling bills and up to 10% on heating bills.

Upgrades the annual insulating performance of single-pane windows to that of double-pane windows and double-pane to triple-pane⁽¹⁾.

3. More comfortable environment with less harmful UV rays.

Keeps solar heat out of your home in the hot weather and radiant heat inside your home during cold weather.

4. Money back in your pocket without the high cost of window replacement.

Installing EnerLogic film is typically a fraction of the cost of replacement windows without all the hassles.
